KPI-2 ICT Systems without DIIS Registration Report

Snapshot Date: 2026-04-23

Indicator: KPI-2 - ICT Systems are registered within DIIS

DIIS registration findings summary

ICT systems in scope: 60

Registered in DIIS: 60 (100%)

Not registered in DIIS: 0 (0%)

Registration is assessed using each ICT system's DIIS Defined status.

Description

Share of in-scope ICT systems marked as registered in DIIS (DIIS Defined). Systems are selected directly, or through infrastructure belonging to the selected managed networks; each system is counted once.

Success Measure: Target = 100% of ICT systems registered within DIIS.

Filter Scope

Network=All | ICT System=All | Criticality=All | Security Domain=All | Environment=All | Asset Type=All | Severity=All | Mission Capability=All | Business Service=All

Observed Non-compliant Condition

KPI-2 is currently within target in this filter scope with no detected non-compliant condition.

Remediation Actions

- Register all non-compliant ICT systems within DIIS and verify metadata completeness.
- Set weekly reconciliation between ICT system inventory and DIIS register.
