KPI AND SPI PERFORMANCE MATRIX

Scores are computed on currently filtered scope.

Managed Network: All | ICT System: All | Environment: All | Asset Type: All | Mission Capability: All | Business Service: All

KEY PERFORMANCE INDICATORS (KPI)

KPI	DESCRIPTION	SUCCESS MEASURE	SCORE	T
KPI-1 Overall SPI Compliance	Share of compliant checks across all applicable SPI evaluations in current filter scope.	Target >= 95% compliant checks.	67% (1353/2020)	<u>6</u>

KPI-2

Non-compliant
Check Burden

Count of failing SPI
checks that need
remediation.

Target = 0
non-compliant
checks.

576

G

KPI-3

Data Quality
Completeness

Count of SPI checks
with
missing/insufficient
evidence (Unknown
status).

Target = 0
unknown
checks.

91

G

KPI-4

High Risk Rule
Triggers

Findings matching
SPI 4/5/6 high-risk
combinations in
production context.

Target = 0
high-risk
triggers.

58

G

KPI-5

Critical
Exposure in
Production

Production assets
with critical-
vulnerability
exposure requiring
urgent treatment.

Target = 0
critical
exposure
findings.

40

G

KPI-6

Immediate
Action
Backlog

Priority 1-2 findings
requiring
immediate
command action.

Target = 0
immediate
action
items.

SECURITY POSTURE INDICATORS (SPI)

SPI

DESCRIPTION

SUCCESS MEASURE

SCORE
(%)

SPI 1

Operating systems must not be out of vendor support.

100% of applicable servers/workstations run vendor-supported OS versions.

57.8%

SPI 2

Operating systems must be N-2 or better.

100% of applicable servers/workstations are N-2 or better.

57.8%

SPI 3

Servers must not have Critical vulnerabilities.

0 servers with critical vulnerabilities.

54.1%

SPI 4

High Risk:
Production
servers must
not have
Critical vulns
with out-of-
support OS.

0 production servers
with critical
vulnerabilities on
unsupported OS.

84.9%

SPI 5

High Risk:
Production
servers must
not have
Critical vulns
with out-of-
support
installed
software.

0 production servers
with critical
vulnerabilities plus
unsupported
installed software.

83.6%

SPI 6

High Risk:
Production-
supporting
workstations
must not have
Critical vulns
with out-of-

0 production-
supporting
workstations with
critical vulnerabilities
plus unsupported
installed software.

92.4%

support
installed
software.

SPI 7

Network
devices must
not have
Critical
vulnerabilities.

0 network devices
with critical
vulnerabilities.

62.5%

SPI 8

Network
devices must
not have
unsupported
OS/firmware.

100% of network-
device OS/firmware
versions are
supported.

68.2%

SPI 9

Network
devices must
be on latest
patches.

100% of network
devices on latest
patch level.

58%

SPI 10

No physical
device should
be EOL or out
of warranty.

0 physical devices in
EOL or out-of-
warranty state.

65%
